Brew the Perfect Cup of Green Tea

Crafting the perfect cup of green tea is an art of balance — gentle heat, patience, and purity.

Step 1 — Measure with Precision

Use approximately 2 grams of green tea leaves for every 200 ml of water. Quality begins with the right proportion.

Step 2 — Heat, Don't Boil

Warm fresh water to around 75°C-85°C. Boiling water can overpower the delicate notes and reduce natural antioxidants.

Step 3 — Gentle Infusion

Pour the hot water over the leaves and allow them to steep for 2-3 minutes. This unlocks a smooth flavour with natural freshness.

Step 4 — Strain & Enjoy

Strain the leaves and savour the clean aroma. Avoid milk; a touch of honey or lemon may be added if desired.

Pro Tip

For a lighter profile, reduce steeping time. For a deeper taste, slightly increase the leaf quantity — never the temperature.
